

Flussbogen Promenade, Ennetbaden

Baden and Ennetbaden have been since Roman times a place for bathing and wellness. Today Ennetbaden wishes to refresh its image and develop tourism by redefining its river promenade and connection to Baden's historic bathing centre. The design concept provides a single strong identifier for the Fluss Promenade, unifying the two banks of Baden and Ennetbaden. A connected wooden path marked by wisteria

vines takes the stroller along the Limmat from Baden to Ennetbaden. In winter, nature has lost its brilliance. The metal structure along our promenade becomes a structural support for a weather protection element. Lit at night, these become at times a kiosk to have warm chestnuts, a place to sit and have a coffee under a gas heater, a Christmas market. The wood promenade offers a privileged rapport to the Limmat and provides a

new promenade along the cafes and public spaces. At times elevated to provide a second tempo to slower walking and sitting areas at the water's edge. In front of the piazzas, the boardwalk gently comes down to ground, creating a generous public space. Marked by a ribbon of wisteria vines and benches.

Design:
Christophe Girot
Atelier Girot GmbH
with
Patrick Gmür Architects,
Engineer Ernst Winkler +
Partner AG

Client:
Stadt Ennetbaden / Baden

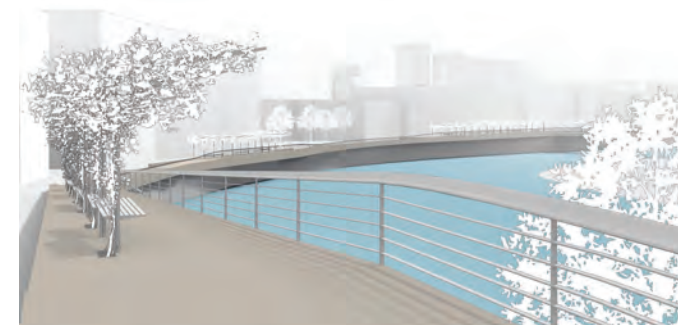

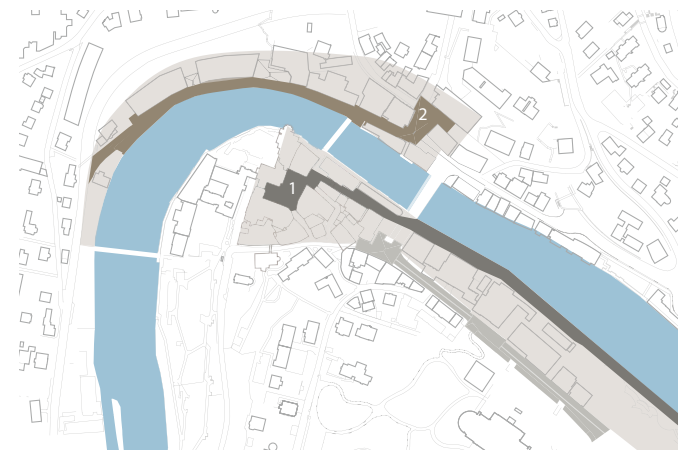

Selected Projects

Competition:
Restricted competition 2007

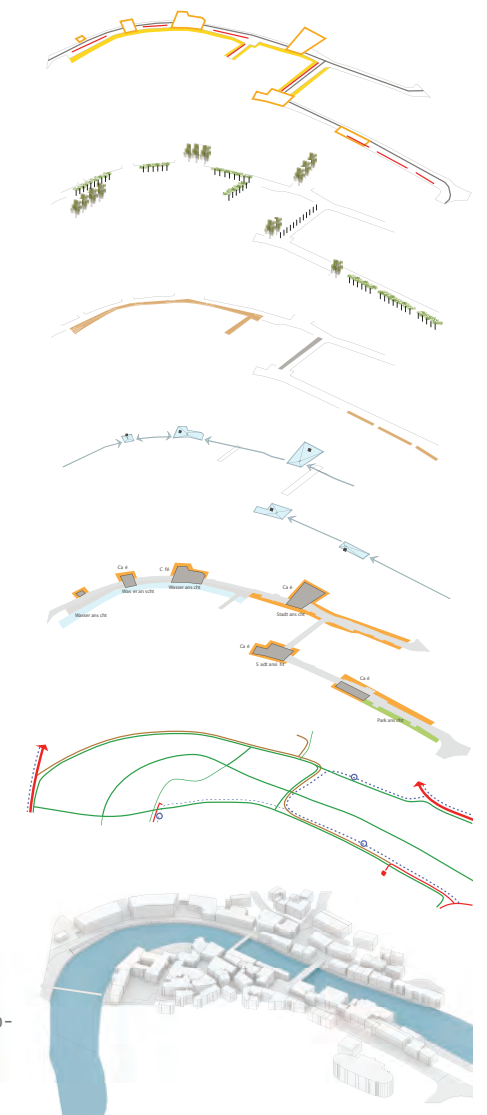

Surface:
1.5 ha

Dates:
Competition 2007

Budget:
30 million CHF
