

Parc Saint Serge, Angers

The Parc Saint Serge in Angers is part of a larger urban development for the new CNP Insurance headquarters designed by the Architects Dusapin & Leclercq.

The 2-hectare park, completed in 2000, is built entirely on the roof of a parking garage. The garden is comprised of trees planted directly into the ground through the underlying parking

structure. The design has a refined water garden and brimming pool. The minimalist lawn area is used for a variety of events, and also serves as a safety platform in case of flash floods from the Maine River, which the park overlooks.

The park is connected to a broader pedestrian area, which connects the heart of Angers along the river.

Selected Projects

Design:
Christophe Girot & JM L'Anton
Atelier Phusis and
Dusapin+Leclercq Architects

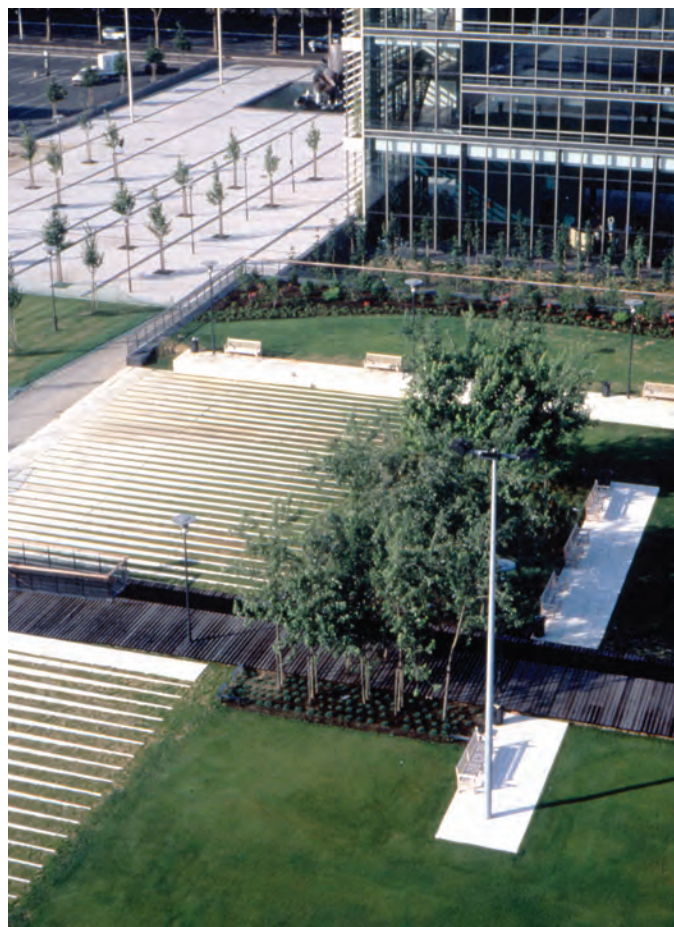

Surface:
2 ha

Dates:
Competition 1996
Construction 2000

Client:
Caisse Nationale de
Prévoyance C.N.P.
