

# University Campus Masterplan, Orsay

Orsay is the biggest and most important scientific campus in France.

This winning Master Plan sets the guidelines for the overall structuring of the campus; showing further development of buildings, circulations and recreational areas. The 400-hectare campus covers the breadth of the valley of the Yvette River as well as part of the Saclay Plateau.

Priority was given to a network of paths and bicycle trails as well as to the creation of specific landscape environments for scientific experimentation and sport and leisure activities.

The Master Plan was approved by the French State and the University of Orsay in 2000. Its implementation will run over the next 20 years.

## Selected Projects

**Design:**  
Christophe Girot  
with  
Lipsky Rollet Architects  
Frédérique Garnier Landscape architect  
Fanny Tassel Urban Architect

**Competition:**  
1<sup>st</sup> Prize

**Surface:**  
300 ha

**Dates:**  
Masterplan 2000  
Realisation 2000-2020

**Client:**  
University of Paris XI  
Region Ile de France

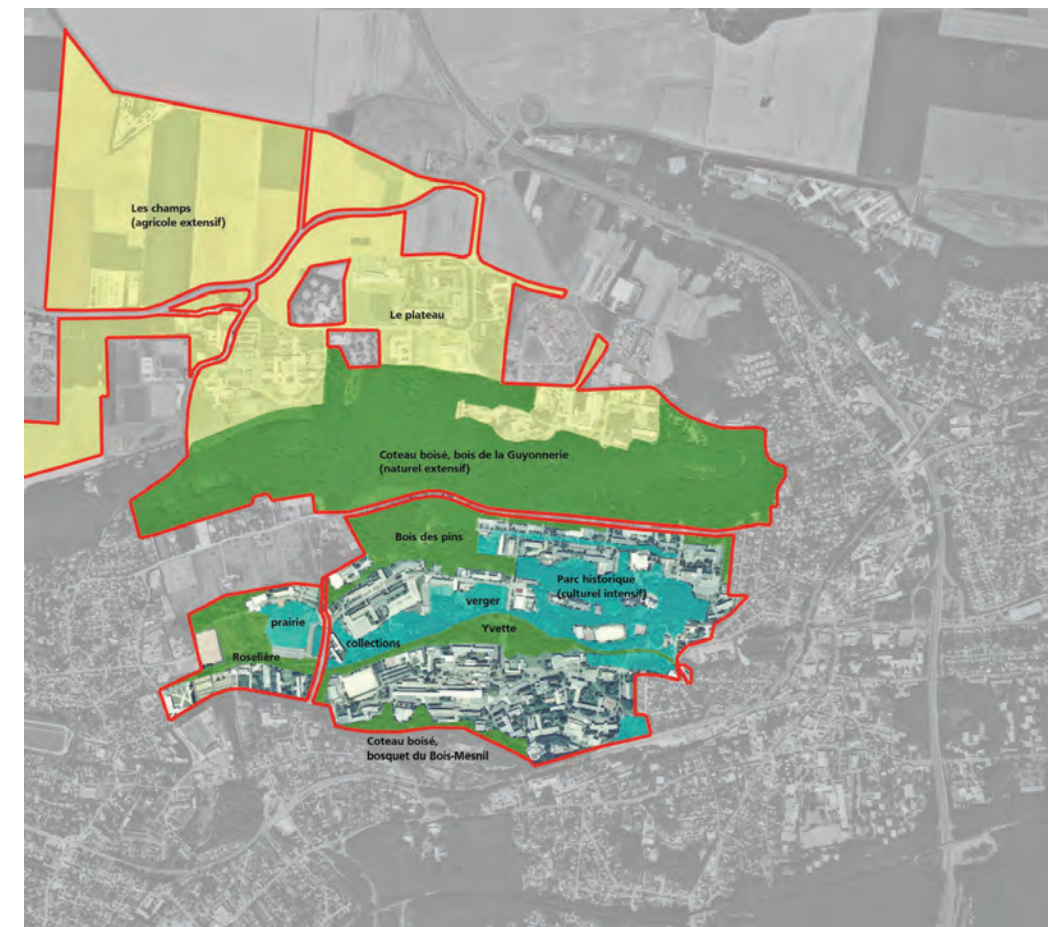

**Budget:**  
30 million Euros
