

# Uniklinik Balgrist, Zürich

This winning design offers the users of the Uniklinik Balgrist a generous outdoor concept that would strengthen the identity of the Clinic.

The entrance is designed as a generous pedestrian zone with large trees and grass areas. Materials aid in defining a continuity through the park. The outdoor area around the clinic is defined by a curved path structure offering numerous opportunities for sitting and relaxation. The plantations will focus on groups of trees such as ginkgo, maple, oak, beech, and linden tree. A clear hedge struc-

ture will reinforce the curved path structure as well as create privacy from the paths.

Two added water areas decorated with lillies will adorn the front and back gardens.

The new landscape concept will strengthen the identity of Balgrist as a place of healing. Construction is planned for end 2011.

## Selected Projects

Design:  
Christophe Girot  
Atelier Girot GmbH  
with  
Schmid & Schnebli Architects

Surface:  
2.5 ha  
Dates:  
Competition 2010  
Project Phase 2011- 2012

Client:  
Swiss Association Balgrist

Budget:  
2 million CHF

Competition:  
1<sup>st</sup> Prize

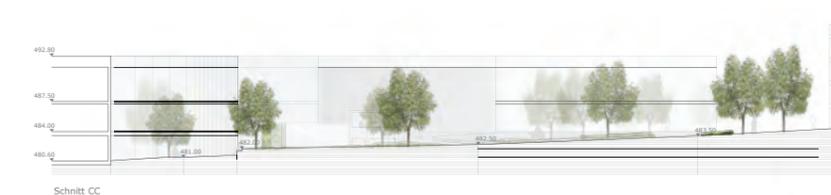

- 1 Masterplan
- 2 1<sup>st</sup> Floor & section EW
- 3 Section WE
